MySQL Practice Questions - DTDC Courier Dataset

Easy (Beginner Level)

1. How many total shipments are recorded in the dataset?

2. List the top 5 cities with the most deliveries.

3. Get the number of shipments for each delivery mode (Surface, Air, Express).

4. How many shipments used value-added services (VAS)?

5. Show the percentage of 'Dox' vs 'Non-Dox' consignments.

Medium (Intermediate Level)

6. What is the average delivery time (in days) for each mode?

7. List the top 3 most used booking codes and their total revenue.

8. Find the average chargeable weight by sender state.

9. What is the total tariff collected per sender state?

10. Which are the most common sender cities by revenue?

Hard (Advanced Level)

11. Identify shipments that were delivered after the expiry date (late deliveries).

12. Rank top sender cities by total amount billed in the last 60 days.

13. Find average delivery time across all shipment modes.

14. Count shipments per mode in the last 30 days.

15. What percentage of shipments are missing receiver signatures?

16. Analyze VAS usage pattern by shipment mode.
